EDUCATION

Nanyang Technological University, Singapore (NTU) Aug 2024 – Present
Bachelor of Science with Honours in Mathematical and Computing Sciences (Double Major)

PROJECTS

Context Aware Risk Engine (CARE) [[GitHub Link](#)] Feb 2026 - Mar 2026

- Architected Bayesian-Simulated Value-at-Risk predictive model using 10,000+ Monte Carlo simulations to establish dynamic traffic safety based on probability and statistical modelling.
- Developed an interactive Streamlit data visualisation dashboard to fuse visual outputs with stochastic risk models, reducing decision latency and enabling actionable safety monitoring.
- Integrated a zero-shot CLIP Transformer using PyTorch to evaluate unstructured visual data, successfully translating engineered semantic anchors into quantified risk metrics.

NTU Project: University Career Services Portal (CLI) [[GitHub Link](#)] Sep 2025 - Nov 2025

- Designed a Role-Based Access Control (RBAC) backend architecture in Java, securely handling distinct data permissions for 3 user tiers to manage authorisation requirements.
- Managed data persistence using CSV handling and custom File I/O to ensure reliable storage.
- Applied strict OOP and SOLID principles, reducing code redundancy to create scalable user profiles and job listing architectures.

Restock Tracker [[GitHub Link](#)] Aug 2025 - Sep 2025

- Engineered a fault-tolerant automation pipeline using Python and Selenium WebDriver to monitor product inventory in real-time, optimising data extraction and processing.
- Implemented "self-healing" logic to automatically detect browser crashes and re-initialise sessions without human intervention, ensuring system availability.
- Optimised resource usage by configuring Headless Chrome and securing Telegram API webhook using environment variables, reducing memory overhead for low-spec server deployment while preventing sensitive data exposure.

EXPERIENCE

Event Host & Assistant | **Eventpool Singapore** | **What a Staff** Mar 2024 - Jul 2024

- Represented clients like Porsche at exclusive events upholding strict standards for guests.
- Facilitated seamless on-site logistics and crowd management for 500+ attendees.

LEADERSHIP & CO-CURRICULAR

Orientation Event | **Honorary General Secretary** Aug 2025 - Present

- Co-organised a large-scale university orientation for 200+ incoming freshmen.
- Collaborated with a large committee to design logistics and safety protocols, ensuring smooth execution of multi-stage activities.

SKILLS & INTEREST

-
- Languages: Python, Java, R, SQL
 - Tools: Git, Streamlit, PyTorch, Hugging Face, OpenCV, NumPy, SciPy, Pandas, Selenium
 - Fluent in English and Mandarin Chinese.
 - Hobbies: Watching football and Korean dramas.
